Khaoula khemiri

Full stack web developer

Mechatronics engineer

I am an experienced mechatronics engineer with a specialization in developing and optimizing electromechanical systems.

I am now looking to transition into web development, leveraging my strong problem-solving skills, quick learning ability, collaborative mindset, and excellent communication skills. I am ready and excited to take a new challenge in the software development industry.

skills and achievements

- -Self-taught Front-End Developer with a passion for creating visually appealing and user-friendly websites.
- -Proficient in HTML, CSS, JavaScript, and React front-end framework.
- Completed a course on back-end development through **Go My Code**

Projects:

- Developed a responsive e-commerce website using React, Redux, Node.js, and MongoDB.
- -Developed a custom admin dashboard website that allowed users to manage and monitor various aspects of a website.
- -Developed multiple projects utilizing various APIs, including a weather app, prayer app, learning app, and converter app.
- Please refer to <u>my online portfolio</u> for a comprehensive overview of my front-end and back-end development projects and skills.

Professional experience

Project Manager - Taki Kids Application TakiAcademy

(2022 - Present)
